# Drugs Made Right

# Audit-Ready For Your Parenterals

At the core of our aseptic drug product manufacturing capabilities is the VarioSys® filling line, a combination of Bausch+Ströbel filling equipment and SKAN isolator technology. The line maximizes product yield, greatly reduces the risks associated with particulate generation and human intervention, and meets all current FDA and EU regulatory requirements.

## Capabilities

### Vials

- Ready-to-use vial sizes 2R, 6R, 10R, 20R, and 30R
- Dosing range 0.25 mL to 30+ mL
- Run rate up to 3,600 vials per hour
- ADVANCEDfill for minimizing loss at start, and end of production
- Stäubli robotic lid and liner removal, and denester
- In-line non-destructive 100% weight checks
- Single use disposable fluid path
- Nitrogen gas overlay
- Crimp sealing under ISO 5 air in separate cabinet
- Labeling and secondary packaging
- Worldwide logistics

### Syringes and Cartridges
