

# Quality Control Services

## We Remove QC Bottlenecks

Stability Studies    Release Testing  
Freeze/Thaw Cycle Studies

Take Control of  
Analytical  
Testing

Specializing in compendial and  
product specific methodologies

With extensive industry experience in both large and small molecule **parenteral drug testing**, Argonaut can effectively manage your **API**, **Drug Substance**, and **Drug Product** stability study programs.

# Quality Done Right

# A Wide Array of Analytical Expertise

Our stability services include **Custom Protocols and Reports**, Pull Schedules, coordination or management of 3rd party laboratories, retain storage, and storage only offerings.

We can oversee your **Raw Material Qualification** and manage your preferred suppliers.

## Temperature Stability

Storage conditions to support long-term & accelerated stability study arms in accordance with ICH Q1A and EP25-A standards.

*-80°C   -20°C   5°C   25°C/60%RH   40°C/75%RH*

Our qualified/validated ICH compliant chambers are under 24-hour surveillance and backed up with emergency power with a validated Building Monitoring System.

## General Chemistry Methods

*HPLC      Visual appearance      Refractive index*

*Gel electrophoresis (PAGE & agarose)*

*UV-vis and fluorescence spectroscopy*

*Viscosity      pH      Osmolality      Conductivity*

## Molecular Diagnostics

*Quantitative PCR*

*DNA quantification*

*DNase/RNase detection*

*Nucleic acid extraction*
