Substance Loss

Aseptic Fill/Finish for Sterile Injectable  
Biologics and Other High-Value Drugs

Argonaut's drug product manufacturing services provide the **yield-maximizing** and **risk-minimizing** features you need to protect your high-value drug substance.

Fully-automated filling within SKAN isolators meets your stringent regulatory requirements. Our experienced team provides the support you need at every phase.

# Drugs Made Right

## State-of-the-Art Technology at Your Service

At the core of our aseptic drug product manufacturing capabilities is the VarioSys filling line, a combination of Bausch-Ströbel filling equipment and SKAN isolator technology. The line maximizes product yield, greatly reduces the risks associated with particulate generation and human intervention, and meets all current FDA and EU regulatory requirements.

### Capabilities

#### Vials

- Ready-to-use ISO vial sizes from 2 mL through 30 mL
- Dosing range 0.25 mL to 30+ mL
- Run rate up to 3,600 vials per hour
- ADVANCEDfill for minimizing loss at start, and end of production
- Stäubli robotic lid and liner removal, and denester
- In-line non-destructive 100% weight checks
- Single use disposable fluid path
- Nitrogen gas overlay
- Crimp sealing under ISO 5 air in separate cabinet
- Labeling and secondary packaging

#### Syringes and Cartridges

- Ask for more information

#### Supporting Services

- Dedicated project manager
- On-site analytical lab
- Worldwide logistics
